To download a copy of a PDF document to your computer, click the link to open the PDF document in a new window. Then click the  save button.

Installation Guides

Installation guides for the current release of PCS Axis v1.9 include those in the list below. These documents are intended for your company's IT Administrator and Database Administrator (DBA).

- [PCS Axis v1.9 Upgrade Installation](#): explains how to upgrade the PCS Axis database, application, and job service agent to version 1.9. The document applies to all PCS Axis installations.
- [PCS Axis v1.9 Client/Server New Installation with Replication](#): explains how to install PCS Axis *with* support for synchronization (replication) in a client/server network. The document applies to new customers installing PCS Axis for the first time and includes installation checklists for IT System Administrator tasks and Database Administrator tasks to help with the process.
- [PCS Axis v1.9 Client/Server New Installation without Replication](#): explains how to install PCS Axis *without* support for synchronization (replication) in a client/server network. The document applies to new customers installing PCS Axis for the first time and includes installation checklists for IT System Administrator tasks and Database Administrator tasks to help with the process.
- [PCS Axis v1.9 Single User New Installation, Non-Client/Server](#): explains how to install the following items on a user's local computer running in a non-client/server environment: PCS Axis application, database, and job service; PCS Axis Connection Manager; and Microsoft® SQL Server® Express 2008 R2 SP2 with Tools.

Best Practice Guides
